

Dr. Edmund Fisher

Fisher Cosmetic Facial Surgery
Bakersfield, California

ASK DR. FISHER

HOW DO YOU EARN YOUR PATIENTS' TRUST?

I build ongoing relationships with patients, listening to their concerns in-depth and pairing them with former patients who have undergone treatment with me so they can attest to the experience and what to expect.

HOW DO YOU MANAGE PATIENT EXPECTATIONS?

I believe that surgery shouldn't involve any surprises. To eliminate anxiety, I show prospective clients several before-and-after examples of other patients' results. All patient decisions are predicated on an in-depth understanding of what the procedure and recovery process will entail.

WHAT DOES YOUR OFFICE LOOK LIKE?

My office, while being completely state-of-the-art, was designed to imitate the cozy atmosphere of a fine home, while remaining technologically advanced with the use of comprehensive technology and innovative equipment.

Specialized treatment

Specializing in facial plastic surgery allows Dr. Fisher to focus his areas of concentration, resulting in a high degree of experience, surgical know-how and accuracy. With his specialization comes a deep appreciation for rhinoplasty surgery and the keen attention to detail it requires. "The nose is intricate and can dictate the overall aesthetic quality of the face. If it is out of balance, or has a hump, it can affect facial contours and how patients feel about themselves," says Dr. Fisher, who seeks to achieve facial harmony and proportion with each procedure he performs. "Facial plastic surgery is a very subjective, individualized field and requires a complete understanding of patients' goals, as well as an artistic eye for beauty and balance." Dr. Fisher enjoys performing revision rhinoplasty surgery, as he feels "every patient deserves to put their best face forward," and welcomes the opportunity to help patients achieve their desired results.

FACELIFT

WHAT IS THE DIFFERENCE BETWEEN A TRADITIONAL FACELIFT AND A LIQUID LIFT?

A liquid facelift is nonsurgical, using various injectables to sculpt the face. Besides filling in the lines around the mouth, your doctor can use fillers to correct a misshaped nose and contour hollows throughout, off-label. Keep in mind, however, that there is no substitute for a facelift, which surgically repositions facial structures and involves trimming away extra skin.

“every patient deserves to put their best face forward”

GENERATING A JOINT EFFORT BETWEEN DOCTOR AND PATIENT TO REALIZE ATTRACTIVE, NATURAL RESULTS IS A KEY PRIORITY OF FACIAL PLASTIC SURGEON DR. EDMUND FISHER. “MY PATIENTS AND I TEAM UP TO CREATE A PERSONALIZED ROADMAP OF OBJECTIVES AND TREATMENT PLANS. FROM THERE, I SET FORTH TO ACHIEVE THE PATIENT’S GOALS AS BEST I CAN, WITH EXTREME DUE DILIGENCE.” DR. FISHER’S PRACTICE, WHICH COUNTS PATIENT REFERRALS AS ITS TOP RESOURCE FOR NEW CLIENTS, CATERS TO EDUCATION AND INTERPERSONAL CONNECTIONS.

ABOUT DR. FISHER

HOW WOULD YOU DESCRIBE YOUR OPERATING ROOM STYLE?

It's very meticulous.

WHY DID YOU BECOME A FACIAL PLASTIC SURGEON?

I was always interested in surgery, even as a child, and found the intricacies and complex anatomy of the face extremely interesting.

HOW INVOLVED ARE YOU IN A PATIENT'S CARE POST-SURGICALLY?

The contact continues well after the procedure. I regularly follow up with patients, seeing them frequently post-surgery to map their healing and long-term results.

WHERE DO YOU PERFORM YOUR SURGERIES?

The majority of my surgical procedures are performed at an outpatient center near my office.
