Dr. Fisher’s practice, which counts patient referrals as its top resource for new clients, caters to education and interpersonal connections. “To establish trust, we build ongoing relationships with patients, listening to their concerns in-depth and pairing them with former patients who have undergone treatment with me so they can attest to the experience and what to expect.” After the procedures, the contact continues. Dr. Fisher regularly follows up with patients, seeing them frequently post-surgery to map the progress of the healing process and long-term results.

Believing that surgery shouldn’t involve any surprises and to help eliminate anxiety, “We show prospective clients several before-and-after examples of other patients’ results. All patient decisions are predicated on an in-depth understanding of what the procedure and recovery process will entail. We place a great deal of emphasis on involving patients in the surgical process,” says Dr. Fisher, who performs the majority of his surgeries at an outpatient surgery center near his practice. The state-of-the-art center complements Dr. Fisher’s office, which strives to “imitate the cozy atmosphere of a fine home, while remaining technologically advanced with the use of comprehensive technology and innovative equipment,” he says. “Patient safety, comfort and reassurance are my main concerns, resulting from a honed skill set, attentive staff and leading-edge care.”

“My patients and I team up to create a personalized roadmap of objectives and treatment plans.”

—EDMUND FISHER, MD, FACS

DR. EDMUND FISHER

OPERATING ROOM STYLE Meticulous
WHY DID YOU BECOME A FACIAL PLASTIC SURGEON I was always interested in surgery, even as a child, and found the intricacies and complex anatomy of the face extremely interesting
FAVORITE PART OF YOUR JOB Performing surgeries
ALTERNATIVE OCCUPATION Professional musician
HOBBIES Music—I play flamenco and electric guitar. I also enjoy skiing and traveling
FRAMED PHOTOS ON YOUR DESK My family and pets
I START EACH DAY Having breakfast with my wife
I’M NEVER WITHOUT My cell phone

INSIDE INFORMATION

SPECIALIZED TREATMENT

Specializing in facial plastic surgery allows Dr. Fisher to focus his areas of concentration, resulting in a **HIGH DEGREE OF EXPERIENCE, SURGICAL KNOW-HOW AND ACCURACY.** With his specialization comes a deep appreciation for rhinoplasty surgery and the keen attention to detail it requires. “The nose is intricate and can dictate the overall aesthetic quality of the face. If it is out of balance, or has a hump, it can affect facial contours and how patients feel about themselves,” says Dr. Fisher, who seeks to **ACHIEVE FACIAL HARMONY AND PROPORTION** with each procedure he performs. “Facial plastic surgery is a very subjective, individualized field and requires a complete understanding of patients’ goals, as well as an **ARTISTIC EYE FOR BEAUTY AND BALANCE.**” Dr. Fisher enjoys performing revision rhinoplasty surgery, as he feels “every patient deserves to put their best face forward,” and welcomes the opportunity to help patients achieve their desired results.
